PROPER STORAGE

- Store your eyeglasses in a cool and dry place. Don't leave in the dashboard of a car where temperature can damage the surface protective coating of your eyeglasses.

- Place your eyeglasses back in their proper case facing upward to avoid scratching the surface. Don't leave them lying in your bed or sofa where it is at risk for accidental damage.
- Avoid putting your eyeglasses on top of your head like a headband. This may cause your eyeglasses to get loose.

RECOMMENDED CLEANING AGENTS

- Use microfiber wiper to clean your eyeglasses, not your shirts or other materials that can scratch the coating of your lenses
- Use the recommended lens spray. Avoid using strong chemical cleaning agents such as 70% alcohol, perfume, or others that can react with the lenses
- Cleaning with soap and water alone can add an extra polish without having that annoying oil deposits on the surface of the lens

MAINTENANCE SERVICE

- Did you know you can visit your optical shop for regular maintenance service of your eyeglasses, and they do this for FREE. Alignment issues, cleaning, nose pad (any other spare part) can also be done.

- Use both hands when wearing and removing your eyeglasses. This will help maintain the alignment and balance of your eyeglasses.
